DESCRIPTION

Made to order here in the UK, the Digitally Addressable Wide Solinas Architectural neon tube offers over 16 million different colour combinations and pixel chasing effects ideal for creating mesmerising visual displays. Featuring fully diffused, 360° illumination and full dimming capabilities.

Available in 1 metre, 1.5 metre 2 metre standard lengths and custom lengths up to 2 metres.

Create stunning ambient visual displays with these Digitally Addressable LED neon tubes, which can either be suspended or surface mounted. Fabricated using only the highest quality componentry, this 110mm diameter tube is ideal for use in long term display installations where durability is paramount.

When purchased along with the compatible driver (sold separately) both hard wiring and plug and play options are available upon request, making these tubes easy to install.

For custom lengths tailored to your exact specification please contact us for a bespoke quote. Please allow for a lead time of 5-7 working days from order confirmation.

Please contact us for a bespoke price on application quote.
